THE MEXICAN EVER-BEARING STRAWBERRY.

The Best Variety Known

A CONTINUOUS AND PROLIFIC bearer from the first of June until frost, rich, sub-acid flavor, fine size, strong growth, vigorous habit. Altogether superior to any other known variety. Price \$2 per dozen. The undersigned are the General Agents for Southern Illinois, counties along and south of O. & M. R. R., of whom, or their authorized agents, all plants or berries of Mexican Ever Bearing must be ordered. For amount of testimony, the following advertisements give an idea of the estimation in which this variety is held by those familiar with its superior characteristics:

State of Michigan, County of Monroe, etc:

FENELON Scranton, being duly sworn, deposes and saith, that he is acquainted with the Mexican Ever Bearing Strawberry Plant, and that he has propagated the said Strawberry for three years, and finds it to be a rich, high day red fruit, very prolific in its bearing, and a stout, healthy plant, and perfectly adapted to this climate. And this deponent further saith that he has cultivated said Strawberry for three years on his premises, and that with unparalleled success, and that the said Strawberry commences its bearing in early summer, and continues bearing until the frost cuts the vine in the fall, and I have even gathered fruit from the said vines when the ground was covered with snow, by having previously covered the vines with straw; and further this deponent saith not.

State of Michigan, County of Monroe, etc:

Dr. J. J. Littlefield, being duly sworn, deposes and says that he has lived a very near neighbor to Fenelon Scranton for the last three years, and knows that the said Scranton has cultivated the Mexican Ever Bearing Strawberry Plant with success to his certain knowledge, and he knows the said Strawberry to be ever bearing and prolific; has used the fruit in his family and finds it to be of high flavor, equalled by none; is acquainted with strawberry culture, and claims this to be superior to all other fruits of the kind, and perfectly adapted to this climate. And further this deponent saith not.
